

Green Road Play Area

Bournemouth, Christchurch & Poole Council

CELEBRATING THE MARITIME IDENTITY OF GREEN ROAD PLAY AREA

The design enhances this much loved play space, building on the strong, colourful identity already present. This theme focuses on the concepts of adventure, imagination, and toddler play as requested by local families and stakeholders. The aesthetic is tailored specifically for this existing blend of natural and bold colour, adhering closely to the BCP Council Design Guide; and utilises a sensitive palette of Robinia Timber to tie in new equipment seamlessly with the existing play provision.

The design is built on the maritime concept by adding a playful "Harbour" toddler play unit, and adding in sea themed details such as the boat wheel play panel. The addition of a wheelchair accessible path leading to a bold blue Mirage seat ensures that all abilities can play together. It is also proposed to refurbish the existing ship to keep it safe, usable and in good condition, while continuing to work with the community to secure funding for a full replacement in the future.
